Description

Strong Graffiti Remover and Graffiti remover / paint Stripper.

Strong Graffiti Remover is a powerful caustic for the removal of the shadows left on after graffiti removal. Its formulation enables Strong Graffiti Remover to cling to vertical surfaces.

Strong Graffiti Remover can also be used as a Graffiti remover / paint stripper.

Specification

Appearance: Liquid

Odour: Mild

Specific Gravity: 1.18

pH: 14

Hazard Identification

Risk & Safety: Corrosive

Hazard Symbols: C

Benefits of using Strong Graffiti Remover

- Removes graffiti shadows
- Formulation for use on vertical surfaces
- Formulation - therefore no splashing
- Can be used as a paint stripper
- Removal of Graffiti Shadows
- Paint Stripper
- Removal of Carbon Pollution

Application of Strong Graffiti Remover

Caution: Do not apply to paint, zinc (galvanising), aluminium or glass as it will damage these substrates

Method: Apply with brick cleaning brush or alkali resistant brush and work well into the surface. Keep agitating with a brush and keep wet by applying more product if necessary. Do not allow to dry.

Rinsing: Good rinsing is essential. Preferably use a high pressure, low volume water pump at 6.9MPa at 18 to 25 litres per minute. 69 BAR at 18 to 25 litres per minute, 1000 PSI: at 4 to 5 imperial gallons per minute. Use a 15 to 45° fan tip. Water at up to 70°C may improve cleaning but is not essential. If high pressure water is not available use low pressure and scrub whilst hosing.

Areas of Use:

- Graffiti and Shadow Removal on all masonry surfaces.

First-aid Measures

- Inhalation:** Move the exposed person to fresh air. Rinse nose and mouth with water.
- Eyes:** Promptly wash eyes with plenty of water while lifting the eye lids. Continue to rinse for at least 15 minutes.
- Skin:** Wash the skin immediately with soap and water.
- Ingestion:** Rinse mouth thoroughly. Drink plenty of water.
